POUR IT ON

COFFEE, TEA & APC

When did everyone become an expert on coffee? People seem to know all about the different varieties and blends, the growing regions and the fair trade practices—but only a select few know what it takes to create a resealable package that protects flavor, preserves freshness, and catches the eye of casual coffee drinkers and devoted connoisseurs. Subject-matter experts on our Solutions Team pair the right materials with the latest packaging innovation to produce the

perfect, most cost-efficient packaging for your coffee and tea products. And thanks to our award-winning digital printing, your products will stand out on the shelf. Let's meet over a cup and discuss what APC can do for you. You bring the coffee, we'll take care of the rest.

CAPABILITIES

Converting

Our Centers of Excellence in New York, Iowa and Wisconsin deploy APC HPE Flexo™, world class rotogravure and digital printing technologies aligned with efficient processes for fast execution and immediate impact

Consumer conveniences and functional differences

- Product protection with clear and opaque barriers

- Comprehensive graphics support
- World-class plate-making systems
- Unique and advanced cylinder engraving process
- APC Center for Sustainable Packaging at RIT

Digital tools that get you to market faster

We're independently owned, with localized decision making, shorter lead times, and a nimble, lean approach to manufacturing. This is why we're able to quickly get your product to market, giving

you the competitive advantage while maintaining the highest quality and strictest brand standards.

Protecting the environment and ensuring the health and safety of our employees is at the core of everything we do and every decision we make. We're committed to supplying safe products that exceed customer quality requirements.
